

WINNER

Excellence in Construction of Commercial Buildings \$5 Million - \$7 Million

Isis Projects Pty Ltd

PROJECT Master Builders House, East Melbourne
ARCHITECT Resource Architecture

The refurbishment of Master Builders Association of Victoria headquarters demanded the replacement of the existing building façade; the installation of innovative architectural fixtures and fittings; and a complete services upgrade, including the installation and commissioning of new mechanical, electrical, hydraulic and audiovisual services. Extensive works of a structural nature were also undertaken in order to enhance both the external and internal aspects of the building. This saw the building modified by landscaping to an internal courtyard, replacement of the existing roof with new colorbond roofing, and aluminium and stone cladding finishes added to the façade and entry to the building.
